1. Technical Specifications and Special conditions for Dredging Work

1.0 Background

Inland Waterways Authority of India (IWAI) is a statutory body set up in 1986 by an Act of Parliament (82 of 1985). The Authority has the principal objectives of development, maintenance and management of National Waterways in the country for shipping and navigation. Kollam – Kottappuram Stretch of West Coast Canal (WCC) along with Champakkara Canal and Udyogmandal Canal in Kerala State was declared as National Waterway w.e.f. 01.02.1993 (NW.3). An Index map of N.W.3 is seen at **Enclosure.1**.

2.0 Project Description

2.1 The scope of the proposed work is to carry out dredging in a section of the Udyogamandal canal, which is particularly used also as the navigational route for the Ro-Ro service between Willingdon island and Bolghatty island. The dredging location is right in front of the Ernakulam city / marine drive. The Objective of the work is to dredge a shallow patch in the Ro-Ro route to a depth of 3.20 m. below Chart Datum for a bottom width of 32 m. The estimated quantity is 53,000 cu.m. which may vary ordinarily by $\pm 10\%$ but the deviation is governed by Schedule.B.

2.2 The material to be dredged is sand, silt, soft clay or a mixture of these materials as well as compact and sedimented clay. Material dredged is proposed to be disposed in to designated disposal sites up to a maximum distance of 1500 m. A map showing the alignment of the channel to be dredged, area to be dredged and identified disposal site is seen at **Enclosure.2**.

2.3 The dredging is required to be carried out using Cutter Suction Dredger and disposal through mainly floating pipe lines.

]

3.0 Duration of work:-

The tendered dredging works is to be executed and completed within a time period of 5 months from the date of award of work, including one month mobilisation period of dredger and ancillary crafts / pipelines.

4.0 Technical Specifications for Dredging Work:-

- (i) Materials dredged may be disposed on to the shallow area available at western side of the channel, for which permission has been granted by the Cochin Port Trust. The material has to be ordinarily disposed up to 1000 mtr away from the dredging area. In case requirement based on site conditions, lengths of pipeline shall be increased as directed by the Engineer-in-charge to maximum distance of 1.50 km for which extra payment will not be paid.

- (ii) The waterway shall be dredged to obtain a channel of 32 m bottom width and 3.20 m depth below chart datum. The side slopes shall be as naturally formed, but for payment the slope up to a maximum of 1 in 5 will be allowed. Preliminary survey charts of the proposed dredging area which also indicates tentative layout of channel proposed to be dredged as well as proposed disposal site, is available for reference at the office of IWAI at Kochi.
- (iii) The tolerance allowable in width shall be 1 m on each side from centerline of channel and that in depth + 20 cms from the specified depth. Depth could exceed beyond the specified minimum for which payment will be limited to + 20 cms only. Quantities on account of depth exceeding + 20 cms and width exceeding the specified limit will not be considered for payment. If the depth or width is observed to be less than the ones specified under para 4 (ii), the Engineer-in-charge will examine the short comings keeping in view the navigational requirements and his decision to accept the work done or to order re-dredging of the channel shall be final and binding on the contractor.
- (iv) The area to be dredged shall be indicated by the Authority based on hydrographic survey charts. Pre and Post dredging surveys shall be carried out jointly by Contractor and representative of IWAI under the supervision of Engineer-in-charge or his nominee. The post dredging survey will be conducted after completion of dredging in minimum length of 250 m. The cross-sections shall be 10 m apart and soundings shall be taken continuously and plotted at 4 m interval on the cross section. The cross-section shall be extended up to 15 m. beyond the limits of the channel on either side. The measurement of dredging shall be in terms of quantity in cu.m. actually dredged by the contractor, assessed on the basis of pre and post dredging hydrographic surveys.
- (v) Sounding boat & equipments and experts required for conducting pre and post dredging surveys shall be arranged by the IWAI. The personnel required for survey shall be arranged by the contractor. Other expenditure like consumables etc. also to be borne by the contractor. The survey shall be conducted in automatic hydrographic survey system.
- (vi) Actual quantity dredged including allowable tolerance in the waterway shall be assessed based on the joint pre and post dredging surveys. The quantity in slopes up to a maximum of 1 in 5 shall be worked out for a width of 10 meter either side of channel. Beyond 10 meter, no quantity will be considered for payment purposes. Area of cross-section shall be computed by using Simpson's Rule and these cross-sectional areas shall be used in trapezoidal rule to arrive at Volume dredged. The areas shall be computed by a combination of Simpson's rule and average method in case the width of channel is not suitable for direct application of Simpson's rule for full width. This aspect is to be decided by the Engineer-in-Charge.
- (vii) The scale of pre and post dredging surveys should be 1:500 and the Contractor shall prepare and submit the survey charts to IWAI. Approved charts will be issued to the contractor by IWAI. The Contractor may prepare

and submit Running Account (RA) Bills supported with due calculations based on the approved charts.

- (viii) After the pre-dredging survey and as soon as the alignment of channel to be dredged is released by IWAI, the proposed channel for dredging is to be marked by bamboo at an interval of 20 m. on both sides by the contractor at no extra cost. The bamboos shall be driven to a suitable depth in the bed and shall project a minimum length of 1.5 m., above the water level with proper warning signs
- (ix) Proper warning signals are to be placed at both sides of the channel to caution other vessel operators during dredging.
- (x) Proper lighting arrangement in red colour has to be provided to caution the location of dredger, anchor, pipeline, anchor pontoons etc. during night time to avoid any accidents. Appropriate buoy marks shall be provided during day time also.
- (xi) Care has to be taken not to block the navigation through the dredging channel. If necessary dredger pipeline etc. has to be shifted to provide safe passage for the Ro-Ro vessel or any other barges etc.
